Impact of Trump/DeVos Proposed Education Cuts on Cities

The following represents **some** of the city-by-city education budget cuts proposed by the Trump/DeVos administration. They include cuts to Title I* and Title II* programs only. The other cuts, including after-school programs, teacher training, school climate and others are difficult to obtain for individual cities. So the actual proposed cuts are larger than what appears below.

*Title I: federal program which provides funding to local school districts to improve the academic achievement of disadvantaged students (cut)

**Title II: federal program which provides funding for programs based on teacher principal development, reduce class sizes and craft new evaluation systems (eliminated)

Note on methodology:

Current Title I funding levels for individual LEAs were pulled from the Department of Education (<https://www2.ed.gov/about/overview/budget/titlei/fy16/index.html>). City cuts were calculated by applying the statewide % cut in Trump's FY18 budget to the relevant LEA. Title II allocations were found directly from each state's Departments of Education and represent the most recent available data.

Appreciation to the research staff of the American Federation of Teachers for assistance in developing this table.
